

Sustainable JHU: What Can You Do?

POWER DOWN

Turn off lights and equipment when not in use. Tools like timers or occupancy sensors can help.

CONSERVE TO CUT CARBON

Utilize computer power management settings on computers and other capable devices to save energy.

DISPOSE ACCORDINGLY

Review the signs on the recycling, composting, and trash bins to make sure items are being disposed of properly.

TAKE BACK THE TAP

Bring a reusable water bottle and fill it at one of many filling stations on campus.

RAISE YOUR VOICE

Consider joining a Green Team and get involved in campus initiatives. Write to greenteams@jhu.edu to learn more.

CHOOSE TO REUSE

Utilize reusable mugs and cups rather than disposables. Bringing your own mug often gets you a discount on coffee!

USE RESOURCES WISELY

Take advantage of the Surplus Furniture program whenever furniture equipment is need or no longer wanted. Contact Kendall Klosky, the Furniture Reuse Program Coordinator, Kendall Klosky (kklosky1@jhu.edu ; 6-5736).

DONATE TO DIVERT

The School of Education collects unwanted school supplies for Baltimore City teachers and counselors. For details on acceptable items or to coordinate a donation, contact Sabrina Scarborough (Sabrina@jhu.edu) or Jeremy Hornberger (Jeremy@jhu.edu, 6-4925).

RETHINK WASTE

To capture those hard to recycle items, join a JHU TerraCycle brigade. Items like pens, energy bar wrappers, toothpaste tubes and makeup containers can be turned into new materials.

FOOD FOR THOUGHT

Whether it's catering for a small meeting or a large event, check out the *Green Event Planning Guide* to ensure that your gathering is zero waste and sustainably sourced.
